

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

HERBERT STANLEY SHURY

Published September, 1918

INTRODUCTORY NOTE

Business houses, commercial organizations, banks, libraries, students of commerce and others have felt the need of a short bibliography of publications dealing with foreign trade subjects. That fact, coupled with my own difficulties in readily finding authoritative references, has convinced me of the advisability of undertaking the publication of such a compilation.

In these pages will be found, (under their proper headings), only those publications—regardless of their nature—that are recognized as authoritative. Completeness is not claimed; that would be impossible in a compilation of this size. It is believed, however, that enough references have been listed under each division to give the reader ample opportunities to extend his knowledge. The list of Government publications, while not entirely complete, will indicate the extent of the voluminous and varied information that can be derived from an investigation of official reports. Although many of those listed are now out of print, a large number may still be obtained and new reports are constantly being published.

In this connection it is appropriate to acknowledge my great indebtedness to the catalogue of publications of the Bureau of Foreign and Domestic Commerce recently issued. This valuable compilation has been referred to constantly and the reader will surely find it an indispensable key to Government publications in the foreign trade field.

In the use of this bibliography it is suggested that the reader make a personal examination of those publica-

tions whose title appears to cover the field in which he is interested. If they cannot be found in a library that is within reach, the publishers will in a great many cases be glad to send books to a prospective buyer for inspection. Sample copies of magazines, etc., may be secured by writing the publishers.

Discretion, of course, must be used in selecting the references listed in this bibliography that will best serve the reader's individual purpose.

It is my pleasure to express grateful appreciation for the assistance rendered by the Foreign Trade Department, National Association of Manufacturers, New York; Professor Lincoln Hutchinson of the University of California, now with the War Trade Board, Washington; Professor Ira B. Cross, University of California, and Robert L. Johnson.

It is hoped that this guide may prove to be of real practical value to whomever refers to it.

HERBERT STANLEY SHUEY.
